

**TRIBAL ENERGY  
ALTERNATIVES**  
— A GRID AFFILIATE —

## **Tribal Construction Program**

### **By Natives, For Natives.**

Our Native-led construction crews install renewable energy systems across Indian Country. Every project is rooted in community values, Tribal collaboration, and local impact.

### **Who We Serve:**

Federally recognized tribes, tribal governments and organizations, and tribal college/universities (TCU's).

### **What We Do:**

- ▲ On-site solar installations for homes, facilities, and community projects
- ▲ Full project development, permitting, and management support
- ▲ Collaboration with Tribal departments and utilities

### **How We Work:**

We listen first. Our programs uplift existing Tribal visions. We don't sell services—we invest in sovereignty.
