

**TRIBAL ENERGY
ALTERNATIVES**
— A GRID AFFILIATE —

Tribal Policy & Advocacy

What We Do

We help Tribal Nations influence policies that determine access to a clean and affordable energy future.

Our Policy Priorities Are:

- Expand Tribal access to distributed energy solutions
- Establish state-level Tribal set-asides and funding
- Strengthen Tribal participation in regulatory processes

How We Work:

- Tribal-led: We center Tribal Nations priorities.
- Technical Policy Expertise: We translate complex legislative & regulatory issues.
- Long-Term Partnership: We stay engaged from the coalition to policy implementation.

Who We Serve:

Federally recognized tribes, tribal governments and organizations, and tribal college/universities (TCU's).

Why Policy Matters

Energy sovereignty requires more than infrastructure.

It requires the power to shape the rules, funding, and decisions that govern Tribal energy futures.

Policy is how Tribes protect their rights and design clean energy systems aligned with community priorities.

We track and participate in regulatory & legislative processes, so Tribes do not have to navigate them alone.
